

Prepare Now

PROTECT YOUR BUSINESS FROM STORM DAMAGE

Severe storms and tornadoes can strike with little warning, causing devastating wind and structural damage. At ServiceMaster Restore, we help commercial properties prepare, respond, and recover from catastrophic weather events nationwide.

PREPAREDNESS TIPS

Our teams are already staging equipment and personnel in high-risk areas. If your region is affected, we'll be nearby and ready to deploy the moment it's safe. To reduce downtime and damage, take proactive steps now with these key storm preparedness tips:

- ▶ **Develop an Emergency Plan.** Outline evacuation procedures, designate shelter areas, and communicate emergency roles to all employees.
- ▶ **Inspect & Reinforce Your Property.** Secure outdoor furniture and signage, trim trees near buildings, and inspect roofing, windows, and doors.
- ▶ **Protect Vital System.** Anchor HVAC units, shield critical machinery, and install surge protection for electrical systems.
- ▶ **Backup & Secure Data.** Regularly back up essential files and store them in a secure, off-site or cloud-based system.
- ▶ **Maintain Emergency Supplies.** Stock flashlights, batteries, radios, first aid kits, tarps, and water in accessible locations.
- ▶ **Check Generator Functionality.** Ensure backup power systems are working and fueled in case of outages.

Taking proactive steps before a storm can drastically reduce property damage and downtime. With ServiceMaster Restore at your side, you can move forward with confidence, knowing expert help is on standby and ready to restore your business, fast.
